TWIG WEB FINDER FREE INTRODUCTORY SERVICE NOW AVAILABLE FOR BUYERS OF TWIG LOCATOR MINIATURE TRACKING DEVICE

Finnish wireless and GPS technology company Benefon today announced that it now offers a free introductory TWIG Web Finder service subscription with purchase of TWIG Locator GPS/GSM tracking device.

The TWIG Web Finder is a service for tracking vehicles and other mobile assets as well as for securing persons. The location of mobile objects can be seen on detailed street maps on three continents.

The service enables users of TWIG products also to receive locations on normal mobile phones as address information. Further features include alarm reception, history functions, sending of SMS messages and workstation operation from multiple sites.

With TWIG Web Finder and the miniature tracking device TWIG Locator, assets can be effectively and conveniently protected against prohibited usage and theft. The "Anchor" -function of TWIG Locator sends a notification to TWIG Web Finder and further to a mobile phone when an asset or a person exits an allowed area.

The TWIG tracking solutions are made with easy use and competitive prices in mind. No installations are required.

The TWIG Web Finder service is provided free of charge for buyers of TWIG Locator device for an introductory 3 months subscription including 20 location credits. Further credits and service extensions can be conveniently purchased at the TWIG eShop.

"Benefon is committed to providing high-quality navigation and telematics services and applications to the market. The TWIG Web Finder is our latest asset tracking and personal safety platform, offered also as an ASP solution," said Benefon CEO Tomi Raita.
