

Twig Discovery Pro Tracer application

Tracer raster map application converts Discovery Pro to portable monitoring and control center. Tracer application allows requesting and viewing the location of any Benefon Telematics instruments e.g. Locator that utilise SMS based MPTP messaging.

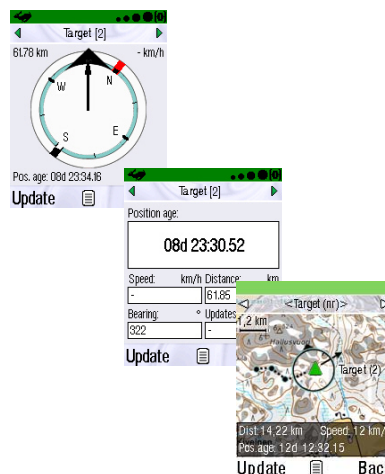

- View targets on raster map
- Use own custom maps*
- Support for WGS84 format maps
- Support for up to 10 map scale levels
- Zooming & Panning of map
- Control GPS mode of Locator & Trackbox
- Activate target tracking, geofencing & position
- Compass view to find target
- Distance & bearing to target
- Detailed data view of the target
- All Discovery Pro telematics functions e.g.
 - Twig SOS with dedicated alarm button
 - Tracking
 - Geofencing
 - Automated status messages
 - UI lock
 - Authorisation methods
 - Assistance call
- Options to add full navigation (SW3005) or Man down alert application**
